Inflammation has reached epidemic levels

Inflammation

is the key underlying factor of many health conditions!

When we carry inflammation daily, the body is using all its resources to deal with the inflammation.

Turmeric has been used for centuries as a natural anti-inflammatory, and countless studies have been written on its effectiveness.

Nanofy Turmeric is the most effective technology available today to remove inflammation and activate our innate healing abilities.

*Clinical studies show that bioavailability levels in women is 277x more and in men 114x more.

Nanofy technology represents a major breakthrough for Curcumin to be delivered at levels of effectiveness never seen before.

“We have overcome the absorption barrier”

The active substance of Turmeric called ‘Curcumin’ is a lipid (fat) and as such is not easily assimilated into the bloodstream. With our patented BioMS processes we increase the absorption up to 277 times more into the bloodstream.
